

Multiple choice questions

1. Which of the following is a mutable? List
2. What will be the output of the following code?

```
X = (1,2,3,4)
x.append((5,6,7))
```

output error
3. What is the correct syntax for creating a tuple? ("a","b","c")
4. Assume air_force = ("f15","f22a","f35a"). which of the following is incorrect? Air_force[2]
= 42
5. Gauge the output of the following code snippet

```
Bike = ('d','u','c','a','t','r')
Bike [1:3]
```

Output ('u','c')
6. What is the output of the following code?

```
Colors = ("V","I","B","G","Y","O","R")
For l in range(0, len(colors),2)
    Print(colors[i])
```

Output ('v','b','y','r')
7. What is the output of the following code snippet?

```
Colors = ("V","I","B","G","Y","O","R")
Corors *2
```

Output ('v','l','b','g','y','o','r','v','l','b','g','y','o','r')
8. Predict the output of the following code.

```
os = ('w','t','n','d','o','w','s')
os1 = ('w','t','n','d','w','s','o')
os < os1
```

output True
9. What is the data type of (3)? Integer
10. Assume tuple_1 = (7,8,9,10,12,13) then the output of tuple_1[1:-1] is. (8,9,10,11,12)
11. What might be the output of the following code.

```
A = ("hello")*3
Print(A)
```

Output 'hellohellohello'
12. What is the output of the following code.

```
Number1 = [1,2,3,4,5]
Number2 = [1,2,3]
Number1.defferece(number2)
```

Output [4,5]
13. Judge the output of the following code.

```
Tuples = (7,8,9)
Sum(tuples,2)
```

Output 26

14. `Tennis = ('steffi','monica','serena','monica',navratilova')`
`Tennis.count(monica')`
Output 2
15. Set is an _____ collection with no _____ items. Unordered, duplicate
16. Judge the output of the following
`Set1 = set(['a','b','c','c','b','c','c','d'])`
`Len(Set1)`
Output 4
17. What is the output of the code shown below?
`S = {1,2,3}`
`S.update(4)`
Output error
18. Tuple unpacking requires a: an equal number of variables on the left side to the number of items in the tuple.
19. The statement that is used to create an empty set is? `Set()`
20. The _____ functions removes the first element of the set c: `POP()`
21. The method that returns a new set with items common to two sets is c: `intersection()`
22. What is the output of the following code snippet?
`S1 = {'a','b','c'}`
`S2 = {'d'}`
`Print(s1.union(s2))` output `{'d','a','b','c'}`
23. The function that makes a sequence by aggregating the elements from each of the iterables is d: `zip()`
24. Predict the output of the following code:
`Even = {'2','4','6'}`
`Odd = {'1','5','7'}`
`Even.isdisjoin(odd)`
`Odd.isdisjoin(even)`
Output True True
25. Which of the following code snippet returns symmetric difference between two sets a:
`x**y`

Mohammad Reza Tawana
